

TripInView presents geotagged helicopter photos & videos of the entire coastlines of countries that are “sun & beach” destinations.

Hoteliers will have the opportunity to register or claim their accommodation properties on TripInView, for free. These services will allow hoteliers to make their accommodation properties known to TripInView's audience from more than 170 countries worldwide.

TripInView aspires to change the way people explore destinations & plan their vacations, by giving travelers the power to explore, discover and choose vacation destinations in a unique visual way.

At the moment travelers can explore the entire Mediterranean coastlines of France, Italy, Spain, Greece and Malta as well as the Southern coastline of Portugal. By the end of 2015 almost all the Mediterranean coastline will be available (by adding even more destinations).
