Tripinview.com is the Regional Winner in European Satellite Navigation Competition 2015

Tripinview has been awarded by the global community of satellite navigation for its technology, which it has been developed and incorporated at tripinview.com and its mobile applications.

In this year's event of the annual European Satellite Navigation Competition tripinview.com presented the technologies used in web and mobile applications and won the award of the Regional Winner. The award reflects the ability of tripinview technologies to highlight the importance of services and infrastructure of the Galileo satellite system.

At the event, that was held in Berlin have been presented services, products and innovations that use satellite navigation systems in everyday life. At the European Satellite Navigation Competition 2015 more than 30 winners from 24 regions from around the world have been awarded. Furthermore, special awards were given to: the European GNSS Agency (GSA), the European Space Agency (ESA), the German Aerospace Center (DLR) and the German Federal Ministry of Transport and Digital Infrastructure (BMVI) in association with the Federal Ministry for Economic Affairs and Energy (BMWi).

Tripinview will use Galileo to improve its geo-location accuracy and automate its pin-on-photo and pin-on-video technology. All images and video footage will be geo-tagged and fully synchronised, making it possible to jump from image to video (and vice versa).
